American Fulbright Scholars, 1990-91

Each year about 1,000 Americans are awarded Fulbright grants to lecture or conduct research abroad. Grants range in duration from the full academic year of the host institution or country to a semester or less.

About 70 percent of the awards are for university lecturing, usually in a field of importance to the host institution. Many lecturing awards allow opportunity for research, and research scholars may undertake occasional lecturing. Terms of awards vary from country to country, but generally include round-trip travel, basic health insurance, and maintenance allowances.

Most awards require a doctorate and appropriate professional experience. While English is acceptable for many assignments, fluency in a language is sometimes required. All applicants must be U.S. citizens.

The National Competition

American scholars and other professionals interested in university lecturing and advanced research abroad should request information and application forms from CIES. An announcement of Fulbright scholar awards to begin 12-18 months later is published each spring.

The Directory

This directory lists over 1,000 American scholars who recently received Fulbright awards for university lecturing and advanced research abroad. They will hold various appointments in approximately 100 countries during the 1990-91 academic year. The dates that appear at the end of most entries indicate when each scholar will be abroad. A few of the dates may have changed, however, since in many cases specific information was not available when the directory was printed. Names of scholars whose awards were confirmed after October 1990 will appear in next year's directory.

The descriptive information for each scholar is arranged according to academic discipline. Scholars are also listed in alphabetical order, by host geographic area, and by home state in the indices.

Following the discipline section are lists of participants in these special programs:

- Indo-American Fellowship Program
- NATO Advanced Research Fellowships
- U.S.-Japan International Education Administrators Program
