Introduction

American Fulbright Scholars, 1997-98

Each year over 700 Americans are awarded Fulbright grants to lecture or conduct research abroad. Grants range in duration from the full academic year of the host institution or country to a semester or less.

About 75 percent of the awards are for university lecturing, usually in a field of importance to the host institution. Many lecturing awards allow opportunity for research, and research scholars may undertake occasional lecturing. Terms of awards vary from country to country, but generally include round-trip travel, basic health insurance, and maintenance allowances.

Most awards require the doctorate and appropriate professional experience. While English is acceptable for many assignments, fluency in a language is sometimes required. All applicants must be U.S. citizens.

The Directory

This directory lists nearly 700 American scholars who recently received Fulbright awards for university lecturing and advanced research abroad. They will hold various appointments in over 100 countries during the 1997-98 academic year. The dates that appear at the end of the entries indicate when each scholar will be abroad. A few of the dates may change, however, since specific information was unavailable when the directory was printed.

The descriptive information for each scholar is arranged according to academic discipline. Scholars are also listed alphabetically, by host geographic

area, and by home state in the indexes. Scholars in special programs or projects are cross-referenced in a separate index.

The directory lists scholars whose grants were confirmed as of September 30, 1997. Additional grants may be issued after this date, and scholars receiving those grants will be listed in a separate section of the 1998-99 edition of the directory.

Following the Special Programs Index is a list of 1996-97 scholars whose grants were confirmed after October 1, 1996, and whose names did not appear in last year's directory.

Participants in the following short-term seminar programs are listed immediately after the discipline section:

- Fulbright German Studies Seminar
- U.S.-Germany International Education Administrators Program
- U.S.-Japan International Education Administrators Program
- U.S.-Korea International Education Administrators Program

The National Competition

American scholars and other professionals interested in university lecturing and advanced research abroad should request information and application forms from CIES. An announcement of Fulbright scholar awards to begin 12-18 months later is published in March.
