**Visiting Fulbright Scholars
and Occasional Lecturers**

“International educational exchange is the most significant current project designed to continue the process of humanizing mankind to the point, we would hope, that men can learn to live in peace—eventually even to cooperate in constructive activities rather than compete in a mindless contest of mutual destruction . . . We must try to expand the boundaries of human wisdom, empathy and perception, and there is no way of doing that except through education.”

Senator J. William Fulbright, on the occasion of the 30th anniversary of the Fulbright Program

Administration and Funding of the Fulbright Program

The Fulbright Program is authorized by Public Law 87-256, the Mutual Educational and Cultural Exchange Act of 1961. The purpose of the program is “to enable the government of the United States to increase mutual understanding between the people of the United States and the people of other countries.” The primary source of funding is an annual appropriation made by the Congress to the U.S. Information Agency (USIA). Participating governments and host institutions in many countries and in the United States also contribute financially through cost-sharing, as well as by indirect support such as salary supplements, tuition waivers, university housing, and other benefits.

Grants are made to U.S. citizens and nationals of other countries for a variety of educational activities, primarily university teaching, advanced research, graduate study, and teaching in elementary and secondary schools.

The Board of Foreign Scholarships (BFS), composed of twelve educational and public leaders appointed by the President of the United States, formulates policy for the administration of the program, establishes criteria for the selection of candidates, and selects candidates for awards.

The U.S. Information Agency administers the program with the assistance of binational educational commissions and foundations in more than 40 countries that have executive agreements with the United States for continuing exchange programs, United States embassies in more than 80 other countries, and three major cooperating agencies in the United States.

The binational commissions and foundations propose the annual country programs, which establish the numbers and categories of grants based on requests from local institutions, review applications of nominated Americans and arrange or confirm their academic affiliation, make travel arrangements for grantees and their families, and provide orientation and facilitative services. In a country without a commission or foundation, the U.S. embassy develops the program and supervises it locally.

The Council for International Exchange of Scholars (CIES) is a private organization that facilitates international exchange in higher education. Under a grant from USIA, CIES cooperates in the administration of the Fulbright Scholar Program.

Visiting Fulbright Scholars and Occasional Lecturers

Each year over 1,000 scholars from abroad are invited to lecture or conduct research in American colleges and universities under the **Fulbright Scholar Program**. Some 900 of the scholars apply for grants through Fulbright commissions or U.S. embassies in their home countries; another 100 are invited by colleges and universities in the United States to lecture in their specific fields under the **Scholar-in-Residence Program**.

To acquaint the American academic community with these visiting scholars and their fields of specialization, the Council for International Exchange of Scholars (CIES), which cooperates with the United States Information Agency in administering the Fulbright Scholar Program, annually publishes the two-volume **Directory of Visiting Fulbright Scholars and Occasional Lecturers**.

In October of each year CIES publishes volume I of the directory; volume II is published later in the academic year. Topics on which scholars are prepared to lecture are listed, as are the American universities with which the visiting scholars are affiliated. In addition to the listing by discipline, the directory has three indices in which the scholars are listed alphabetically, by home country, and by host state. The directory assists institutions that wish to participate in the **Occasional Lecturer Program**.

The Occasional Lecturer Program

Colleges and universities are encouraged to contact visiting scholars directly, but visits may also be arranged through the CIES Occasional Lecturer Program. Through this program CIES assists prospective institutions in selecting appropriate lecturers by providing copies of application papers of grantees. Particular attention is given to the needs of institutions with little opportunity for international lecturers. Limited funds are also available from CIES to assist in meeting travel expenses.

Responsibilities of Host Institutions

Institutions wishing to invite a visiting Fulbright scholar should develop a comprehensive plan for the visit and inform the lecturer of arrangements well in advance. The length of the lecturer's stay at each institution depend upon the particular interests of the academic community and the facilities available, but the period should be sufficient to provide an opportunity for the visitor to become acquainted with the educational program and the academic life of the host institution. A program of two to three days' duration is suggested, or a longer period if visits to several member institutions of a consortium are planned.

Host institutions are asked to provide local transportation, accommodations, and meals for the lecturers. If possible, an honorarium should be considered. The lecturer should also be advised in advance what the host institution will provide and what he/she is expected to pay. Anticipated expenses, such as round-trip travel, local transportation, accommodations, meals, etc., should be itemized with the responsibility for payment indicated.

Suggested activities for the visiting lecturer are:

- An initial general assembly or convocation where the lecturer can be presented to students and faculty;
- Lectures in classrooms where the lecturer can make a contribution to the discipline;
- Faculty meetings where there can be an exchange of ideas on higher education;
- Informal coffees or teas with students and/or faculty;
- Invitations to dinner in student living groups;
- Home hospitality provided by the faculty;
- Meetings with community organizations or church groups that have a special interest in international relations.
