INTRODUCTION

The 800 Fulbright Visiting Scholars who come to the United States each year offer a wonderful resource for U.S. campuses and communities across the country. All of the scholars, for example, are available to make subsidized short-term visits through the Occasional Lecturer Program in order to share their academic expertise as well as insights into their homelands and cultures.

This annual directory provides a cross-indexed listing of most of the 2003-2004 Visiting Scholars and provides instructions on how to request a Fulbright Scholar to visit your campus or community under the Occasional Lecturer Program.

The complete list of scholars, including those confirmed after the directory's publication, is available online at www.cies.org. Also on the Web site is comprehensive information on the Fulbright Visiting Scholar Program, as well as instructions for requesting a Visiting Scholar for an academic term or year. You can request a brochure on the program from scholars@cies.iie.org or by calling 202.686.8664.

We urge you to take advantage of the Visiting Scholar Program. Contact any of the staff listed on the inside front cover of this directory for additional information.

Occasional Lecturer Program

The Council for International Exchange of Scholars (CIES) provides travel awards through the Occasional Lecturer Program (OLP), which enable Fulbright Visiting Scholars to accept guest lecturing invitations at colleges and universities. OLP Awards are granted at three different levels,

depending upon the distance traveled. CIES will determine the award amounts. Financial assistance is also available for Visiting Scholars to present papers at scholarly and professional conferences.

The program enables Visiting Scholars to

- share their specific research interests,
- speak on the history and culture of their countries,
- exchange ideas with U.S. students, faculty and community organizations,
- become better acquainted with U.S. higher education and
- create linkages between their home and host institutions.

Arranging an Occasional Lecturer Visit. If you find a scholar in the directory whom you would like to invite to your campus, you may contact the scholar directly via the faculty associate and department provided. You can also contact CIES staff to obtain a contact telephone number or e-mail address. (See the staff listing on the inside of the front cover.)

Occasional Lecturer Awards are provided directly to the participating scholar. To apply for an award, the Visiting Scholar must submit to CIES a formal letter of invitation from the host institution or organization, along with dates of travel, at least one month before the visit is to take place. (If possible, scholars are asked to submit their requests even further in advance.) Within one week of receiving the application, CIES will inform the scholar whether the award has been approved. The scholar is responsible for purchasing an airline ticket or arranging some

other means of transportation, such as a train, bus or rental car. After the visit, the Fulbrighter will receive the award.

Multiple Occasional Lecturer Visits and Visits to Minority-Serving Institutions. Due to limited funding, each scholar is eligible for only one trip; however, requests to visit more than one institution on a single trip will be considered. An exception to the one-trip rule may be made if the scholar is invited to guest lecture at minority-serving colleges and universities. Additional monies are available to scholars visiting these institutions.

Attendance at Professional Meetings. Scholars invited to professional meetings as presenters may also receive travel funds through the Occasional Lecturer Program. Conference coordinators are encouraged to arrange participation by contacting Visiting Scholars directly.

Responsibilities of Institutions and Organizations Hosting Occasional Lecturers. Institutions wishing to host a Fulbright Scholar should develop a comprehensive plan of activities and arrangements to share with the scholar well in advance of the proposed visit. Host institutions are asked to provide Occasional Lecturers with local transportation, accommodations and meals.

It is important to inform the scholar, prior to arrival, about the support the host institution or organization will provide. Institutions should also provide the scholar with a formal letter of invitation as early as possible. The scholar will need this letter to formally request travel funds from CIES.

Length of Visit. The length of the lecturer's stay at the institution will depend upon the particular interests of the academic community or organization

and the facilities available. The period, however, should allow an opportunity for the scholar to become acquainted with the host institution or organization. A program of two to three days is suggested; a longer period may be advisable if visits to several institutions are planned.

Suggested Activities for Occasional Lecturers. Visiting Lecturers have engaged in the following activities in the past:

- department- or school-wide lectures to students or faculty or both,
- lectures in classrooms where the scholar can make a contribution to the discipline,
- faculty meetings that allow for an exchange of ideas,
- informal gatherings of students and faculty,
- home hospitality offered by faculty,
- meetings with community organizations or religious groups that have a special interest in international relations and
- panel participation at professional conferences.

Occasional Lecturer Stories

The following are examples of the many ways campuses, communities and Visiting Scholars have benefited from the Occasional Lecturer Program:

Dr. Krishnan Rajam, a Fulbright Visiting Scholar from **Malaysia**, was affiliated with the Bloomberg School of Public Health at Johns Hopkins University in Baltimore, Maryland where he both lectured and continued his research on the assessment of injury prevention policies in Asia. His wide expertise in injury prevention in Asia made him a desired lecturer in a variety of organizations and institutions throughout the United States. During his four-month grant, Dr. Rajam visited the Lewis College of Business in Michigan, the Morehouse School of Medicine in

Georgia, Lincoln University of Missouri and the University of Hawaii System in Honolulu as an Occasional Lecturer. Dr. Rajam met the faculties and discussed with the students the global and national perspective of injury prevention. He never missed the chance to acquaint his audience with the people, the culture and the beauty of Malaysia.

In addition to his work with George Washington University while on his Fulbright grant, *Dr. Tirth Khaniya's* professional experience beyond the Washington, DC area turned out to be dearly appreciated by his U.S. colleagues and very beneficial for him. As a participant in the Occasional Lecturer Program, he combined a visit to Penn State University with a visit to Lincoln University, a minority-serving institution in Lincoln, Pennsylvania, where he also received a certificate of appreciation. He also visited the Center for International and Development Education at UCLA, where he shared with faculty members and students the achievements of his research in **Nepal** on the identifying factors contributing to educational reform.

During her occasional lecturing visits to the University of Tennessee–Chattanooga and the University of Nebraska at Lincoln, *Dr. Olga Ouchakova* spoke on T.S. Eliot's reputation in **Russia** and laid the groundwork for future professional collaboration with both institutions. Dr. Ouchakova is an associate professor and head of the Department of Foreign Languages at Tyumen State University in Russia. She was awarded a Fulbright grant to conduct research on "T.S. Eliot and Russian Culture: Aspects of Cross-Cultural Communications" at Grand Valley State University in Allendale, Michigan.

Dr. Mukhammadzakhrab Ismanov is a professor in the Department of Agricultural Engineering at

Tashkent State Technical University in **Uzbekistan**. Through the Occasional Lecturer Program, Dr. Ismanov successfully introduced his strategy for protecting crop plants from both toxic levels of salts in the soils and the loss of soil moisture at the United States Agricultural Information Network (USAIN) 2003 Conference, titled "Agricultural Information for the New Millennium: New Crops, Biotechnology and Saving the Past." Dr. Ismanov is constantly updating the results of his research on cotton production and the movement, organization, and societal status of U.S. cotton farmers.

Visiting Scholar Stories

Occasional Lecturers are drawn from a large pool of Visiting Scholars who are in the United States as Fulbright researchers and lecturers. These scholars routinely express how personally and professionally gratifying their Fulbright experiences have been, whether they are here for only a few months or a full academic year. Institutions hosting these visiting Fulbrighters are equally pleased with how much their visitors are able to share with their students and faculty, from cultural details about their home countries to technical expertise in a variety of disciplines as diverse as astrophysics, music and literature. These stories are just a few examples of successful recent visits. To read more scholar stories, visit our Web site at www.cies.org.

Africa

Examining theater as a force for social change was the focus of *Juliana Omoifo Okoh*, a faculty member in the Department of Creative Arts at the University of Port Harcourt in Port Harcourt, **Nigeria**. Her goal was to examine the potential of theater as a medium to convince Nigerian women that they can achieve positions of authority in society if they liberate

themselves from stereotyped roles. In the Smith College Theater Department, she was able to study Latin American playwright Augusto Boal's Theater of the Oppressed and German dramatist Bertolt Brecht's Epic Theater theories and practice and the role they have played in American feminist theater. John Connolly, provost/dean of the faculty at Smith College, took a special interest in her research program and helped fund an extension to her grant. He and Dean Susan Bourque also arranged for the college to donate 10 computers for Omoifo Okoh to take back to Nigeria to help set up a women's resource center at the University of Port Harcourt.

East Asia and the Pacific

"I saw my grant as a wonderful opportunity to pursue my research without the diversions and responsibilities that are part of being a university teacher," says *Claire Smith*, an expert in Australian Aboriginal culture who teaches at Flinders University in Adelaide, **Australia**. As part of her Fulbright research project to develop principles for using indigenous material in multimedia, Smith worked with Native Americans in various parts of the United States at community, state and federal levels. She also had the opportunity to work with Harriet Mayor Fulbright, widow of Senator J. William Fulbright. Smith met Mrs. Fulbright at a Fulbright Scholars enrichment function and invited her to be patron for the Fifth World Archaeological Congress, held in Washington, DC in June 2003. Smith and Joan Gero, a Fulbright alum and professor of anthropology at American University, organized this conference on indigenous peoples and cultures.

Europe

Striving to find a way of identifying those children in **Poland** who are at risk for lead poisoning, *Dr. Dorota Jarosinska* spent her year as a Fulbright

Scholar in Research Triangle Park, North Carolina. Jarosinska, a fellow at the Institute of Occupational Medicine and Environmental Health in Sosnowiec, came to the National Institute of Environmental Health Science to compare lead screening programs between children in Poland and the United States. She plans on using her new insights to start projects in Poland combating the problem of lead poisoning.

Eurasia

Leonid Yablonsky, a Russian archaeologist and professor in the department of Scythian-Sarmatian at the Russian Academy of Sciences, came to the University of California at Santa Barbara to promote understanding among Russian and American archaeological scholars. He traveled to a number of other universities where he noticed significant differences in the knowledge possessed by students in both countries. He explained that while U.S. scholars are better educated in traditional fields such as Greece, Rome, and South America, Russian scholars have access to facilities offering research on a wider scope of world history. Citing the language barrier and current economic situation in **Russia** as obstacles to the exchange of information, Yablonsky is confident that his presentations helped improve understanding among American and Russian archaeologists.

The Middle East and North Africa

An assistant professor of architecture at Jordan University of Science and Technology in Irbid, **Jordan**, *Rami Farouk Daher* held a semester-long Fulbright lecturing grant, during which he took a socio-critical approach to conservation and Islam. His focus was the Ottoman and contemporary periods in the area known as Greater Syria (Bilad al Sham), which encompasses Syria, Lebanon, Jordan, Israel and the Palestinian areas. During his Fulbright semester, Daher joined the Center for

Middle Eastern Studies (CMES) at the University of California–Berkeley. What attracted him to CMES were the diversity and the strength of its faculty and scholars in areas related to heritage and globalization, colonial and post-colonial theory, and Ottoman studies. Daher was also involved in research related to another of his multidisciplinary interests: the politics of Third World tourism in a global economy. He presented several lectures on this topic to undergraduate and graduate anthropology classes at Berkeley.

South Asia

Sundari Krishnamurthy was determined to create a deeper understanding of her homeland, **India**, during her time as a Fulbright Scholar-in-Residence in the United States. She lectured on Indian philosophy at Hillsborough Community College in Tampa, Florida, traveling also to Dixie State College of Utah and Polk Community College in Florida. Her lectures focused primarily on the ways in which Indian philosophy can be viewed as manifestations of art, culture and religious practices. Her students

were eager to learn about Indian culture and found her lectures valuable in dispelling misperceptions about the country.

Western Hemisphere

Jorge Ibanez-Cornejo summed up his year in Chicago on a Fulbright grant as “one of the best years we’ve had as a family.” A chemistry professor from Mexico City, **Mexico**, Ibanez-Cornejo came to Loyola University with his wife, their two daughters, and, at various times, three nieces and a nephew. Ibanez-Cornejo taught and conducted lab work at the university, set up an environmental chemistry lab, gave guest lectures in West Virginia and Texas, presented papers at a number of professional meetings and had one paper published. He also formed close friendships with many of his new colleagues, two of whom have visited him in Mexico City. The Iberoamericana University, Ibanez-Cornejo’s home institution, will be welcoming a researcher from Loyola in the near future.

SPECIAL PROGRAMS INDEX

To find out more about a scholar, turn to the individual's complete directory entry, which can be found in the section corresponding to the discipline listed after the scholar's name.

Aegean Initiatives

Prompted by President Clinton's visit to Greece and Turkey in 1999, the Aegean Initiatives Program was established to promote the development of mutual understanding between the two countries. The program brings together two to three teams of one Greek and one Turkish scholar for three-month research awards, to conduct studies on a problem common to both countries, including issues such as environmental advocacy, economic development and tourism.

ADMINISTRATION AND FUNDING OF THE FULBRIGHT SCHOLAR PROGRAM

The flagship international educational exchange program sponsored by the U.S. Government, widely known as the Fulbright Program, is designed to increase mutual understanding between the people of the United States and the people of other countries. With this goal as a starting point, the Fulbright Program has provided more than 250,000 participants—chosen for their leadership potential—with the opportunity to observe each others' political, economic and cultural institutions, exchange ideas and embark on joint ventures of importance to the general welfare of the world's inhabitants.

The Fulbright Program was established in 1946 under legislation introduced by former Senator J. William Fulbright of Arkansas. The Fulbright Program is administered by the Bureau of Educational and Cultural Affairs of the United States Department of State.

Since the establishment of the Program, nearly 44,000 Fulbright Visiting Scholars have conducted research or taught in U.S. universities, and approximately 42,000 Fulbright U.S. Scholars have engaged in similar activities abroad. The Fulbright Program awards approximately 800 grants to Visiting Scholars each year. Currently, the Program operates in 140 countries worldwide.

The primary source of funding for the Fulbright Program is an annual appropriation made by the United States Congress to the Department of State. Participating governments and host institutions in foreign countries and in the United States also contribute financially through cost-sharing and indirect support, such as salary supplements, tuition waivers and university housing. The Congressional appropriation for the Fulbright Program in fiscal year 2003 was \$122.9 million. Foreign governments, through their binational commissions or foundations, contributed an additional \$28 million directly to the Fulbright Program.

The J. William Fulbright Foreign Scholarship Board (FSB), composed of 12 educational and public leaders appointed by the President of the United States, formulates policy for the administration of the program, establishes criteria for the selection of candidates and approves candidates nominated for awards.

The United States Department of State, Bureau of Educational and Cultural Affairs develops policies to assure fulfillment of the purposes of the Program and administers it with the assistance of binational education commissions and foundations in some 51 countries that have executive agreements with the United States for continuing exchange programs, United States Embassies in 89 other countries and a number of cooperating agencies in the United States.

Binational commissions and foundations draw up the annual program plan for exchanges, in consultation with participating universities and organizations in the host country. They also screen, interview and recommend to the FSB qualified candidates for student and faculty grants under their exchange programs. In a country without a commission or foundation, the Public Affairs Section of the U.S. Embassy develops the program and supervises it locally.

The Council for International Exchange of Scholars (CIES), under a cooperative agreement with the Department of State, administers the Fulbright Scholar Program for faculty and professionals. CIES is a division of the Institute of International Education (IIE) and has close working relationships with the major disciplinary bodies in the humanities, social sciences and natural sciences. During the terms of their grants in the United States, Fulbright lecturers and researchers are assisted by CIES.

Internationalize Your Campus Through the Fulbright Occasional Lecturer Program

The Occasional Lecturer Program (OLP) provides travel awards to Fulbright Visiting Scholars for round-trip transportation, which enables scholars to accept short-term guest lecturing invitations at colleges and universities as well as to make presentations at conferences.

Occasional lecturers

- offer department- or schoolwide lectures to students and/or faculty;
- lecture to classes where the scholar can make a contribution to the discipline, meet with faculty for an exchange of ideas and engage in informal discussions with students;
- enjoy home hospitality offered by the faculty or department host; and
- address community organizations that have a special interest in international relations.

Every Fulbright Visiting Scholar is eligible for one OLP trip. Scholars who visit institutions that serve predominantly minority-student populations are eligible for more trips.

The *Fulbright Visiting Scholar Directory* lists Visiting Scholars who are in the United States for the current academic year. Use this listing to find and extend invitations to scholars whose research or lecturing topics are of interest to your institution. The directory is also available online at www.cies.org.
