1. CSB #94 was reviewed with discussions on some of the decision points. After a brief discussion, it was decided that we would not use the gmd cartographic materials. We also discussed the use of terms for the 300 field for electronic resources. We decided to use the terms listed in 9.5B1 and we will not apply the option to use the conventional terminology (CD-ROM, etc.)

2. Mary brought an example of a problem with the accepting of the URL in a monographic record. She will discuss the problem with the LAT and also revise her procedure to give more examples for her unit.

The agenda for next Tues, the 12th is to explore the reorganization of the InfoLinks Steering Committee along the lines of functional modules. Sue, Deb and I are charged with reporting ideas for this reorganization back to Steering. This is being discussed in the hope of making changes easier to accomplish.
