Usability Testing
The group finalized plans for submitting our proposal to the Institutional Research Board for a targeted March 2012 study.

Juhi asked for volunteers to help with producing the videos and Boyd volunteered. We still need to identify the best options for microphones as the stick mics pick up a lot of background noise. The old Amigos mics we used previously do not have USB connectors.

(Update: The proposal has been submitted and the IRB was scheduled to meet on 2/10. We have a budget of $100).

New Campus CMS
Juhi and Boddie reported on the two vendors for a new campus CMS. Jadu and OmniUpdate. Each vendor will be providing an opportunity for hands-on testing later in February.

SharePoint
The group offered suggestions to Boddie about content for an upcoming SharePoint workshop that he will be teaching.

CONTENTdm / BAD Times
Youngblood reported on the progress on the BAD Times project and the group discussed the migration to version 6 of the CONTENTdm software. Juhi will write a memo about Web Services' role in the upgrade for Ganson.

Next meeting: Friday, February 17th, 9am
Respectfully submitted,
B. Juhi
