University of Arkansas Libraries
Web Development Group  3/8/12
Present:  Boyd, Ganson, Gilbertson, Hartman, Juhl, Lennertz Jetton, Morgan, Spiegel, Youngblood
Action items in Yellow.

Usability Testing
The group reviewed the preparations for the Usability study on 3/14/12 and members signed up for time slots.

Other
Boyd requested that an A-Z index be added to the personnel database page at http://libinfo.uark.edu/info/personnel.asp  (done). The group reviewed the sorting and emailing options on that page and suggested enhancements.
Still need to add an email link for the Selectors at http://libinfo.uark.edu/collectionmanagement/selectors.asp.

Juhl and Lennertz Jetton reported on UITS' implementation of iTunesU; we have been asked to contribute videos but have questions about the overall goals of the site. Lora has asked to meet with the site administrators.

Juhl reported that Trent has the new CONTENTdm server running at http://130.184.236.55/cdm/. The next step will be to meet with the digitization team and decide on customizations that are needed for migration. Youngblood suggested that we would want customized landing pages for each collection before cutover.

Next meeting:  4/5/12
Respectfully submitted,
B. Juhl
