Present: Dougherty, Gilbertson, Hartman, Juhl, Lennertz Jetton, Morgan, Spiegel, Youngblood
Guest: Wallack

Action items in Yellow.

Juhl welcomed Dougherty. We think she has been appointed to our committee. At any rate, we like her and enjoy having her around.

Special Collections Redesign
The only agenda item for this meeting was a final review of the Special Collections redesign. Overall, the committee found the new design appealing and easy to navigate.

Youngblood and Wallack discussed some of the design decisions and also reported on some last minute changes suggested by Special Collections staff. These included changing the "Manuscripts" menu header to "Collections:" as well as tweaking the background color of menu items.

Juhl asked about mobile versions and the committee felt that this was not a priority at this time, as the new campus CMS will have this built in.

Morgan distributed a checklist of the next steps.

Upcoming agenda items
Personnel Directory
Juhl reported that Banks, Hartman, Boyd, and others have been looking at adding photos (optional) to the library personnel directory pages and making them more in line with other pages on campus. Since the personnel database already has a field for portraits this should be easy to do.

In addition, Juhl reported that Web Services has a draft profile system in place for faculty or staff profiles; these can hold c.v. information such as education and degrees, publications, memberships, etc. Example: http://libinfo.uark.edu/info/profiles.asp?email=tstankus

Juhl will contact Banks about attending an upcoming meeting to discuss.

Mobile
Spiegel met with Boopsie at ALA and can give a quick report on their services.

CONTENTdm projects
Lennertz Jetton inquired about the status of the new CONTENTdm platform. Special Collections has been gathering material for an exhibit celebrating the anniversary of the Buffalo National River. An event is planned for September.

Respectfully submitted,
B. Juhl
