USIA FULBRIGHT SENIOR SCHOLAR PROGRAM

# Visiting Fulbright Scholars and Occasional Lecturers

Each year some 700 scholars from abroad hold grants to lecture and conduct research in American colleges and universities under the Fulbright Scholar Program. While the majority of the scholars apply for grants through Fulbright commissions or U.S. embassies in their home countries, approximately 30 are invited by colleges and universities in the United States to lecture in their specific fields under the Scholar-in-Residence Program.

To acquaint the American academic community with the visiting scholars and their fields of specialization, the Council for International Exchange of Scholars (CIES), which cooperates with the United States Information Agency in administering the Fulbright Scholar Program, annually publishes the *Directory of Visiting Fulbright Scholars and Occasional Lecturers*. The directory, through its listing of grantees' lecturing and research topics, assists institutions that wish to invite scholars to campus via the Occasional Lecturer Program (see below).

Available in late September, the directory contains a comprehensive listing by academic discipline, which includes scholar names, home geographic areas, lecturing or research project titles, American universities with which they are affiliated, and dates of stay in the United States. Scholars are also listed alphabetically, by home geographic area, and by host state.

Note: Grants for some visiting scholars currently in the United States were not confirmed until after this directory went to press. Names of scholars not included in the 1998-99 directory will appear in the next edition and will be posted on the CIES web site: [www.cies.org](http://www.cies.org).

## The Occasional Lecturer Program

Colleges and universities are encouraged to contact visiting scholars directly (using the faculty associate names and addresses in this directory) to arrange visits by the scholars. The Occasional Lecturer Program provides limited funds for round-trip transportation of scholars who accept lecturing invitations. Special attention is given to the needs of institutions with little opportunity for international lecturers.

Professional organizations wishing to invite scholars to be presenters or discussants at meetings may also utilize the Occasional Lecturer Program. Meeting organizers are encouraged to contact visiting scholars directly.

## Responsibilities of host institutions

Institutions wishing to invite a visiting Fulbright scholar should develop a comprehensive plan for the visit and inform the lecturer of arrangements well in advance. The length of the lecturer's stay at each institution will depend upon the particular interests of the academic community and the facilities available, but the period should be sufficient to provide an opportunity for the visitor to become acquainted with the educational program and academic life of the host institution. A program of two to three days' duration is suggested, or a longer period if visits to several member institutions of a consortium are planned.

Host institutions are asked to provide local transportation, accommodations, and meals for the lecturers. The lecturer should be advised in advance of what the host institution will provide

A visiting scholar who wishes to accept a lecturing invitation under this program must submit a formal letter of invitation from the host institution, along with dates of travel and approximate cost of round-trip economy airfare, one month before the visit is to take place. Within two weeks after receiving this information, CIES will inform the scholar whether or not the travel request has been granted. The scholar is responsible for purchasing his/her airline ticket, and is reimbursed up to a maximum of \$650 after the travel takes place. Due to limited funding, each scholar is eligible for only one trip, although requests to visit more than one institution on a single trip will be considered. An exception to the one-trip rule may be made if the scholar guest lectures at colleges and universities serving predominantly minority student populations or programs serving the physically challenged.

## Suggested activities for the visiting lecturer may include:

- Department- or school-wide lectures to students and/or faculty;
- Lectures in classrooms where the scholar can make a contribution to the discipline;
- Faculty meetings that allow for an exchange of ideas;
- Informal gatherings of students and faculty;
- Home hospitality offered by the faculty;
- Meetings with community organizations or religious groups that have a special interest in international relations;
- Panel participation at professional conferences.

# Administration and Funding of the Fulbright Program

The Fulbright Program is authorized by Public Law 87-256, the Mutual Educational and Cultural Exchange Act of 1961, as amended. The purpose of the program is "to enable the government of the United States to increase mutual understanding between the people of the United States and the people of other countries . . . and thus to assist in the development of friendly, sympathetic, and peaceful relations between the United States and other countries of the world." The primary source of funding is an annual appropriation made by the Congress to the United States Information Agency (USIA). Participating governments and host institutions in many countries and in the United States also contribute financially through cost-sharing, as well as by indirect support such as salary supplements, tuition waivers, university housing, and other benefits.

Grants are made to U.S. citizens and nationals of other countries for a variety of educational activities, primarily university teaching, advanced research, graduate study, and teaching in elementary and secondary schools. Grants for foreign nationals are available through the binational commission/foundation or U.S. embassy in the country of citizenship. The Fulbright Scholar-in-Residence Program also provides opportunities for U.S. host institutions to sponsor visiting lecturers.

**The J. William Fulbright Foreign Scholarship Board**, composed of 12 educational and public leaders appointed by the President of the United States, has statutory responsibility under the Mutual Educational and Cultural Exchange Act of 1961 (Fulbright-Hays Act), as amended, for the selection of all Fulbright grantees and the supervision of the Fulbright Program worldwide, including the formulation of policy guidelines governing such exchanges.

**The United States Information Agency (USIA)** develops policies to assure fulfillment of the purposes of the program and administers the program with the assistance of binational educational commissions and foundations in some 50 countries that have executive agreements with the United States for continuing exchange programs, United States embassies in approximately 90 other countries, and a number of cooperating agencies in the United States.

**The binational Fulbright commissions and foundations** establish the numbers and categories of grants, based on the annual commission/foundation program proposal and on their consultations with local universities; review applications of nominated Americans and arrange or confirm their academic affiliations; and provide orientations and facilitative services. In a country without a commission or foundation, the U.S. embassy develops the program and supervises it locally.

**The Council for International Exchange of Scholars (CIES)**, affiliated with the Institute of International Education, is a private organization that facilitates international exchange in higher education. Under a cooperative agreement with USIA, CIES assists in the administration of the Fulbright Scholar Program.
