FULBRIGHT VISITING SCHOLAR PROGRAM

2002-2003 Directory of Visiting Scholars and Occasional Lecturers

FULBRIGHT SCHOLAR PROGRAM

Sponsored by the United States Department of State, Bureau of Educational and Cultural Affairs

CIES is a division of the Institute of International Education.

"Let me say that Dr. Juris Rozenvalds' visit was a terrific success. He was a superb ambassador and a great addition to our community. We have developed a wide range of follow-up plans that will keep Rutgers and the University of Latvia in close contact."
Dr. Edward Rhodes, Director, Center for Global Security and Democracy and Assistant Professor, Department of Political Science, Rutgers, State University of New Jersey – New Brunswick

"Dr. Okut and his family have been a delight and we have learned much from them. Clearly his collaboration with us at work has been an outstanding success, and the opportunity to interact with him on a more personal basis has lead to a greater appreciation of just how similar we are, despite our cultural differences."
Dr. Terry E. Duncan, Senior Research Scientist, Oregon Research Institute

"Dr. Thienprasert showed a high level of dedication and enthusiasm that in part came from her sense of responsibility towards the Fulbright Program and her desire to make every hour of her experience here count. It is my impression that the Fulbright Program actively selects exceptionally bright and hard-working scholars who are open and appreciative to teaching and mentoring."
Dr. Joseph R. Hibbeln, Senior Clinical Investigator, and Dr. Norman Salem, Chief, Laboratory of Membrane Biophysics and Biochemistry, National Institute on Alcohol Abuse and Alcoholism, National Institutes of Health

"Yujin Yaguchi was an active and visible member of our scholarly community. He introduced many of us to American studies in the Japanese context. We learned much from him, and he very much enjoyed his stay here."
Christopher Connery and Gail Hershatter, Co-directors, Center for Cultural Studies, University of California – Santa Cruz

"The students in my group interacted with Dr. Rahman both professionally and socially during her stay in our department. I know that a number of them learned a great deal about Malaysia, Islam, and Southeast Asia. Dr. Rahman, in turn, spent time in our community exploring the culture of Indiana and Purdue University."
Mark Lipton, Associate Professor, Department of Chemistry, Purdue University

INTRODUCTION

The 800 Fulbright Visiting Scholars who come to the United States each year offer a wonderful resource for campuses and communities across the country. All of the scholars, for example, are available to make subsidized short-term visits through the Occasional Lecturer Program in order to share their academic expertise as well as insights into their homelands and cultures.

This annual directory provides a cross-indexed listing of most of the 2002-2003 Visiting Scholars and provides instructions on how to request a Fulbright scholar to visit your campus or community under the Occasional Lecturer Program.

The complete listing of scholars, including those confirmed after the directory's publication, is available online at **www.cies.org**. Also on the Web site is comprehensive information on the Fulbright Visiting Scholar Programs, as well as instructions for requesting a Visiting Scholar for an academic term or year. You can request a brochure on the program from **scholars@cies.iie.org** or by calling 202.686.8664.

We urge you to take advantage of the Visiting Scholar Programs. Contact any of the staff listed on the inside front cover of this directory for additional information.

Occasional Lecturer Program

The Council for International Exchange of Scholars (CIES) provides funds through the Occasional Lecturer Program to cover the round-trip travel costs of Fulbright Visiting Scholars invited to U.S. colleges and universities and local communities for short-term guest lecturing visits. Financial assistance is also available for Visiting Scholars to present papers at scholarly and professional conferences.

The program enables Visiting Scholars to

- share their specific research interests,
- speak on the history and culture of their countries,
- exchange ideas with U.S. students, faculty and community organizations,
- become better acquainted with U.S. higher education and
- create linkages between their home and host institutions.

Arranging an Occasional Lecturer Visit. If you find a scholar in the directory whom you would like to invite to your campus, you may contact the scholar directly via the faculty associate and department provided. You can also contact CIES staff to obtain a contact telephone number or e-mail address. (See the staff listing on the inside of the front cover.)

Occasional Lecturer travel funds are provided directly to the participating scholar. To obtain funds to cover round-trip transportation costs, the Visiting Scholar must submit to CIES a formal letter of invitation from the host institution or organization, along with dates of travel and approximate cost of round-trip economy airfare, at least **one month before the visit** is to take place. (If possible, scholars are asked to submit

their requests even further in advance.) Within one week of receiving the letter and travel itinerary, CIES will inform the scholar whether the request for funding has been approved. The scholar is responsible for purchasing an airline ticket or ticket for some other means of transportation, such as a train, bus or rental car. After the visit, the Fulbrighter will be reimbursed for up to a maximum of $750 for travel only.

Multiple Occasional Lecturer Visits and Visits to Minority-Serving Institutions. Due to limited funding, each scholar is eligible for only one trip; however, requests to visit more than one institution on a single trip will be considered. An exception to the one-trip rule may be made if the scholar is invited to guest lecture at minority-serving colleges and universities. Additional monies are available to scholars visiting these institutions.

Attendance at Professional Meetings. Scholars invited to professional meetings as presenters or discussants may also receive travel funds through the Occasional Lecturer Program. Conference coordinators are encouraged to arrange participation by contacting Visiting Scholars directly.

Responsibilities of Institutions and Organizations Hosting Occasional Lecturers. Institutions wishing to host a Fulbright Scholar should develop a comprehensive plan of activities and arrangements to share with the scholar well in advance of the proposed visit. Host institutions are asked to provide occasional lecturers with

- local transportation,
- accommodations and
- meals.

It is important to inform the scholar, prior to arrival, about the support the host institution or organization will provide. Institutions should also provide the scholar with a formal letter of invitation as early as possible. The scholar will need this letter to formally request travel funds from CIES.

Length of Visit. The length of the lecturer's stay at the institution will depend upon the particular interests of the academic community or organization and the facilities available, but the period should allow an opportunity for the scholar to become acquainted with the host institution or organization. A program of two to three days is suggested; a longer period may be advisable if visits to several institutions are planned.

Suggested Activities for Visiting Lecturers. Occasional Lecturers have engaged in the following activities in the past:

- Department- or school-wide lectures to students and/or faculty,
- Lectures in classrooms where the scholar can make a contribution to the discipline,
- Faculty meetings that allow for an exchange of ideas,
- Informal gatherings of students and faculty,
- Home hospitality offered by faculty,
- Meetings with community organizations or religious groups that have a special interest in international relations and
- Panel participation at professional conferences.

Occasional Lecturer Stories

The following stories illustrate the many ways campuses, communities and Visiting Scholars have benefited from the Occasional Lecturer Program.

Josef Glasa, a lecturer at the Postgraduate School of Medicine in Bratislava, **Slovak Republic**, spent his two-day occasional lecturer visit to Illinois speaking at the Center for Bioethics and Human Dignity and Trinity International University. Glasa addressed a number of bioethical issues currently being discussed in Central and Eastern Europe and compared them to the debates surrounding similar issues in the United States. As one of his hosts explained, "he helpfully added light rather than merely heat" to often controversial bioethical topics. Georgetown University's Kennedy Institute of Ethics hosted Glasa during his three-month research grant.

The Women's Studies Group at Brandeis University invited Fulbright scholar *Niaz Zaman*, professor and chair of the English department at the University of Dhaka in **Bangladesh**, to speak to faculty and students. During her visit, the scholar gave a presentation on "Bonds and Borders: Women Novelists and the Creation of India and Pakistan." Zaman reported that the lecture was well attended and that the audience displayed considerable interest in the political and social conditions in her country. The visit was also of great benefit to her because she was able to make trips to Amherst and Concord to visit the homes of Emily Dickinson and Louisa May Alcott as well as to read manuscripts at the Boston Public Library. Zaman's Fulbright research project was on the male models and mentors in the lives and works of Margaret Fuller, Dickinson and Alcott.

During her occasional lecturing visit to Ohio Northern University, **Russian** scholar *Marina Karaseva* shared her considerable knowledge of music as well as methods of ear training. Her host, chair of the university's music department and a Fulbright alumnus, stated that Karaseva "motivated our students to strive for higher goals." In addition to her campus visit, the scholar gave a presentation at an Ohio Music Educators meeting on ear training methodology taught at Russian conservatories. The associate professor at the Moscow State Conservatory had a nine-month grant at the University of Maryland-College Park, where she conducted research on cognitive musicology and practical psychology.

Kwadwo Opoku-Agyemang, a scholar from **Ghana**, visited elementary schools in Louisiana as an occasional lecturer. Speaking on Ghanaian customs and folklore, he gave the students insight into life beyond the rural parish or the New Orleans projects in which many of them live. Opoku-Agyemang, a Scholar-in-Residence, spent his Fulbright year at Grand Valley State University in Michigan lecturing on African and African American literature.

Other Visiting Scholar Stories

Occasional Lecturers are drawn from a much larger pool of Visiting Scholars who are in the United States as Fulbright researchers and lecturers. These scholars routinely express how personally and professionally gratifying their Fulbright experiences have been, whether they are here for only a few months or a full academic year. Institutions hosting these visiting Fulbrighters are equally pleased with how much their visitors are able to share with their students and faculty—from cultural details about their home countries to technical expertise in a variety of disciplines as diverse as astrophysics, music and literature. These stories are just a few examples of successful recent visits. To read more

scholar stories, visit "The Fulbright Experience" section on our Web site at **www.cies.org**.

Africa

An associate professor at the University of Yaounde I, *Gilbert Doho* came from **Cameroon** to the University at Albany, State University of New York as a Scholar-in-Residence to research how theater can be used as a tool for empowerment. Through the use of gestures, movement and song, Doho employs what he calls "expressionary theater" as a catalyst for social change and a way to facilitate universal communication. It is his hope that his research can be used to examine the importance of theater as a medium to foster democracy in Cameroon. During his stay in the U.S., Doho visited Northern Michigan University where he helped students in applying performance techniques to health care issues develop a contemporary AIDS play, *Phambili*, targeting the needs of American university students. Upon his return to Cameroon, Doho hopes to use his research and experiences in America to facilitate the participation of the disadvantaged rural people and promote communication and leadership development in the villages.

East Asia and the Pacific

Manogaram Maniam, a well-known Malaysian actor and director, has played a myriad of roles on stage and screen. He took his enthusiasm for drama to the United States, where he used his Fulbright grant to research ethnic and multicultural theater models. His hope was to use the American model to help create a unified sense of Malaysian identity. "You can be black, white, red or yellow in the U.S., but you're still an American. We haven't quite reached this point in **Malaysia**, and I believe it's essential that we do," he explained. In addition to visiting theaters and theater departments in cities including Chicago, Los Angeles, New York and Washington, D.C., Maniam gave public lectures and presentations on Malaysian culture and politics and the role of education and the arts in developing a multicultural country.

Europe

Jan Vranckx, a medical specialist from Leuven University Hospital in **Belgium**, brought his expertise to Boston for a year to conduct research. He worked in the Tissue Engineering and Gene-Transfer Lab in the Longwood Medical Area, where Harvard Medical School and several affiliated hospitals are located. Vranckx's research involved studying the behavior of cultivated tissues to improve the growth of cells and tissues, especially in difficult cases such as diabetic wounds, extensive burns, radiation after tumor removal or trauma. The Boston region provided him with numerous opportunities for growth and scholarship. For example, Vranckx was able to attend a lecture in which the two teams leading the Human Genome Project revealed their findings.

The New Independent States

Ukranian scholar *Ivanna Ibragimova* went to the Heinz School of Public Policy and Management at Carnegie Mellon University in Pittsburgh. Ibragimova, who works in **Ukraine's** Ministry of Justice, undertook a multi-disciplinary research investigation focusing on the study and comparison of the American and Ukrainian systems' gathering, exchanging, studying and use of information in public administration and policy. Information

Systems to Support Public Administration, or ISSPA, is an important component in helping a country make the transition to a market economy and democratic society, according to Ibragimova. She says ISSPA is a troublesome issue for the Ukraine, which is in the process of becoming a fully democratic civil society. Ibragimova plans to use her research as a basis of helping her government develop a new public-oriented communication strategy for Ukraine.

The Middle East and North Africa

Arab students are the largest growing minority in Michigan schools. Because Michigan and other states in the U.S. are struggling to learn how best to serve Arab families and their children, *Samira Moosa*, director of the Educational Research Center at Sultan Qaboos University in Muscat, **Oman**, decided it would be valuable to research ways in which schools and communities could reach out to Arab families and help their children succeed in the American school system. Moosa's research was conducted in collaboration with faculty at Eastern Michigan University (EMU). EMU was selected in part because of its proximity to the second largest Arab community in the U.S. Her research focused particularly on teachers' beliefs and misconceptions about parent involvement, attitudes and practices regarding their children's education. The study also examined parents' communication styles and teacher efficacy with Arab students and their families.

South Asia

Sunil Kanwar, an assistant professor in the economics department at the University of Delhi in Delhi, **India**, received a Fulbright grant to Yale University that enabled him to research intellectual property rights, specifically in relation to their implications for research and development, technological change and economic growth. He also studied issues relating to the breadth of intellectual property protection and the patentability of life forms. "Given that agriculture constitutes the mainstay of most developing economies even today, the issues relating to intellectual property protection in agriculture are perceived to be of crucial importance for their economic development," he states.

Western Hemisphere

When *Yolanda Teran*, a Kichwa Indian and national coordinator of indigenous education and culture for the National Council of Indigenous Women from **Ecuador**, received a Fulbright grant to be a Scholar-in-Residence at Sisseton Wahpeton Community College in South Dakota, she knew that it would be an eye-opening experience for both her and her students. She discovered that while there were, indeed, many similarities between the two indigenous cultures, there were also important differences. In the fall semester she taught "Growing Up Indian" and during the spring term she taught "Contemporary Issues of Indian Life." In both classes, her goal was to help her students understand the significance of culture, cultural identity and multiculturalism. She asked her students to make comparisons between Dakota and Kichwa cultures and to find the differences and similarities. She also encouraged them to recover their ancestral roots and feel proud of being Indians.

ADMINISTRATION AND FUNDING OF THE FULBRIGHT SCHOLAR PROGRAM

The flagship international educational exchange program sponsored by the U.S. Government, widely known as the Fulbright Program, is designed to increase mutual understanding between the people of the United States and the people of other countries. With this goal as a starting point, the Fulbright Program has provided more than 250,000 participants—chosen for their leadership potential—with the opportunity to observe each others' political, economic and cultural institutions, exchange ideas and embark on joint ventures of importance to the general welfare of the world's inhabitants.

The Fulbright Program was established in 1946 under legislation introduced by former Senator J. William Fulbright of Arkansas. The Fulbright Program is administered by the Bureau of Educational and Cultural Affairs of the United States Department of State.

Since the establishment of the Program, 43,000 Fulbright Visiting Scholars have conducted research or taught in U.S. universities, and more than 41,000 Fulbright U.S. Scholars have engaged in similar activities abroad. The Fulbright Program awards approximately 800 grants to Visiting Scholars each year. Currently, the Program operates in 140 countries worldwide.

The primary source of funding for the Fulbright Program is an annual appropriation made by the United States Congress to the Department of State. Participating governments and host institutions in foreign countries and in the United States also contribute financially through cost-sharing and indirect support, such as salary supplements, tuition waivers and university housing. The Congressional appropriation for the Fulbright Program in fiscal year 2002 was $119 million. Foreign governments, through their binational commissions or foundations, contributed an additional $28 million directly to the Fulbright Program.

The J. William Fulbright Foreign Scholarship Board (FSB), composed of 12 educational and public leaders appointed by the President of the United States, formulates policy for the administration of the program, establishes criteria for the selection of candidates and approves candidates nominated for awards.

The United States Department of State, Bureau of Educational and Cultural Affairs develops policies to assure fulfillment of the purposes of the Program and administers it with the assistance of binational education commissions and foundations in some 51 countries that have executive agreements with the United States for continuing exchange programs, United States Embassies in 89 other countries and a number of cooperating agencies in the United States.

Binational commissions and foundations draw up the annual program plan for exchanges, in consultation with participating universities and organizations in the host country. They also screen, interview and recommend to the FSB qualified candidates for student and faculty grants under their exchange programs. In a country without a commission or foundation, the Public Affairs Section of the U.S. Embassy develops the program and supervises it locally.

The Council for International Exchange of Scholars (CIES) under a cooperative agreement with the Department of State, administers the Fulbright Scholar Program for faculty and professionals. CIES is a division of the Institute of International Education (IIE) and has close working relationships with the major disciplinary bodies in the humanities, social sciences and natural sciences. During the terms of their grants in the United States, Fulbright lecturers and researchers are assisted by CIES.

Internationalize Your Campus Through the Fulbright Occasional Lecturer Program

The Occasional Lecturer Program provides financial support for round-trip transportation, which enables scholars to accept short-term guest lecturing invitations at colleges and universities as well as to make presentations at conferences.

Occasional lecturers

- offer department- or schoolwide lectures to students and/or faculty.
- lecture to classes where the scholar can make a contribution to the discipline, meet with faculty for an exchange of ideas and engage in informal discussions with students.
- enjoy home hospitality offered by the faculty or department host.
- address community organizations that have a special interest in international relations.

Additional funds are available for scholars who wish to visit institutions that serve predominantly minority student populations.

The *Directory of Visiting Fulbright Scholars and Occasional Lecturers* lists visiting scholars who are in the United States for the current academic year. Use this listing to find and extend invitations to scholars whose research or lecturing topics are of interest to your institution. The directory is also available online at **www.cies.org**.

For additional information on the Occasional Lecturer Program, call 202.686.6235 or send an e-mail message to **olp@cies.iie.org**.
