CAMPUS PERSPECTIVES

"Beyond research, Dr. Nguyen and his family were gracious guests; they were superb ambassadors to our department, faculty, staff and students of the rich culture of Vietnam. Perhaps the visit and our resulting close friendship is particularly poignant to Dr. Nguyen and myself as students during the 1960's conflicts between our nations. During his time here Dr. Nguyen and his family were truly part of the department, participating in all the social events, often visiting many of our homes, and frequently hosting dinner parties at their apartment."

Dr. James G. Baldwin, Professor and Chair, Department of Nematology, University of California–Riverside

"Professor Comtois brought a true sense of international understanding and collaboration based on his French Canadian heritage. He made a special effort to help colleagues and students understand the international dimension of his culture and traditions. His international experiences show the breadth to which an individual can extend himself to deal with large-scale research issues."

Dr. Stuart Gage, Professor and Associate Director, Center for Global Change and Earth Observations, Michigan State University

"Dr. Suburo's willingness to impart her own knowledge, experience and insight was of great value to our fellows and graduate students. Her maturity, enthusiasm and easy adaptation to our techniques and scientific procedures set a wonderful example for lab members, emphasizing the benefits of mutual understanding."

Dr. Patricia A. D'Amore, Senior Scientist and Professor of Ophthalmology and Pathology, The Schepens Eye Research Institute

"Leda Guimarraes was very active within our program. Perhaps the most significant contribution was her initiative in trying to establish more ongoing connections between our department and her own university, the Federal University of Goais. It is likely that two of our faculty will visit there next year. She has translated for publication essays by two more faculty and she has formed and led a faculty group to write a grant to fund a more formal exchange program for students and faculty. There is no doubt that Leda did increase the understanding of Brazilian culture of our students and faculty. She is a wonderful representative of her country."

Dr. Michael Parsons, Professor, Department of Art Education, The Ohio State University

"Dr. Lilic had substantial exposure to the students, faculty and staff of the School of Law. Through his courses and lectures he did a great deal to help U.S. students and faculty understand conditions in Yugoslavia. He participated in numerous social events that contributed to better personal relationships with members of the Pittsburgh community."

Professor Ronald A. Brand, Director, Center for Legal Education, University of Pittsburgh School of Law

INTRODUCTION

The 800 Fulbright Visiting Scholars who come to the United States each year provide a valuable resource for campuses and communities throughout the United States. All of the Visiting Scholars are available to make subsidized, short-term, guest-lecturing visits to colleges, universities, K-12 schools and school districts and community organizations through the Occasional Lecturer Program. The enclosed directory is designed to offer assistance in the identification of individuals who will be able to share their academic expertise as well as insights into their countries and cultures.

As a comprehensive resource for the Occasional Lecturer Program, this directory provides a cross-indexed listing of most of the 2004-2005 Visiting Scholars and provides instructions on how to request a Fulbright Scholar to visit your campus or community under the Occasional Lecturer Program.

The complete list of scholars, including those confirmed after the directory's publication, is available online at www.cies.org. Also on the Web site is comprehensive information on the Fulbright Visiting Scholar Program, as well as instructions for requesting a Visiting Scholar for an academic term or year. You can request a brochure on the program from scholars@cies.iie.org or by calling 202.686.8664.

We urge you to take advantage of the Visiting Scholar Program. Contact any of the staff listed on the inside front cover of this directory for additional information.

Occasional Lecturer Program

The Council for International Exchange of Scholars (CIES) provides travel awards through the Occasional Lecturer Program (OLP), which enables Fulbright Visiting Scholars to accept guest lecturing invitations at colleges and universities. OLP Awards are granted at three different levels, depending upon the distance traveled. CIES will determine the award amounts.

The program enables Visiting Scholars to

- share their specific research interests,
- speak on the history and culture of their countries,
- exchange ideas with U.S. students, faculty and community organizations,
- become better acquainted with U.S. higher education and
- create linkages between their home and host institutions.

Arranging an Occasional Lecturer Visit. If you find a scholar in the directory whom you would like to invite to your campus, you may contact the scholar via the faculty associate and department provided. You can also contact CIES staff to obtain a contact telephone number or e-mail address. (See the staff listing on the inside of the front cover.)

Occasional Lecturer awards are provided directly to the participating scholar. To apply for an award, the Visiting Scholar must submit to CIES a formal letter of invitation from the host institution or organization, along with dates of travel, at least one month before the visit is to take place. (If possible, scholars are asked to

submit their requests even further in advance.) Within one week of receiving the application, CIES will inform the scholar whether the award has been approved. The scholar is responsible for purchasing an airline ticket or arranging some other means of transportation, such as a train, bus or rental car. After the visit, the Fulbrighter will receive the award.

Multiple Occasional Lecturer Visits and Visits to Minority-Serving Institutions. Due to limited funding, each scholar is eligible for only one trip; however, requests to visit more than one institution on a single trip will be considered. An exception to the one-trip rule may be made if the scholar is invited to guest lecture at minority-serving colleges and universities. Additional monies are available to scholars visiting these institutions.

Responsibilities of Institutions and Organizations Hosting Occasional Lecturers. Institutions wishing to host a Fulbright Scholar should develop a comprehensive plan of activities and arrangements to share with the scholar well in advance of the proposed visit. Host institutions are asked to provide Occasional Lecturers with local transportation, accommodations and meals.

It is important to inform the scholar, prior to arrival, about the support the host institution or organization will provide. Institutions should also provide the scholar with a formal letter of invitation as early as possible. The scholar will need this letter to formally request travel funds from CIES.

Length of Visit. The length of the lecturer's stay at the institution will depend upon the particular interests of the academic community or organization and the facilities available. The period, however,

should allow an opportunity for the scholar to become acquainted with the host institution or organization. A program of two to three days is suggested; a longer period may be advisable if visits to several institutions are planned.

Suggested Activities for Occasional Lecturers. Visiting Lecturers have engaged in the following activities in the past:

- department- or school-wide lectures to students or faculty or both,
- lectures in classrooms where the scholar can make a contribution to the discipline,
- faculty meetings that allow for an exchange of ideas,
- informal gatherings of students and faculty,
- home hospitality offered by faculty and
- meetings with community organizations or religious groups that have a special interest in international relations.

Occasional Lecturer Stories

The following are examples of the many ways campuses, communities and Visiting Scholars have benefited from the Occasional Lecturer Program:

Rachida El-Diwani, professor of comparative literature in the Department of French Language and Literature at Alexandria University in Cairo, **Egypt**, was affiliated for nine months with Chatham College in Pittsburgh working on her project "Understanding the Islamic World: Art, Ethnicity, Gender, Mythology and Philosophy."

"I want and need the people of America to understand that Islam is peace and not violence. It is my duty as a Muslim to build bridges of understanding and love for all human beings," states El-Diwani.

As a Fulbright Scholar she took the opportunity provided by the Occasional Lecturer Program to lecture at five other institutions, including minority-serving institutions. She spoke about the Western misconceptions of Islam while visiting Howard University in Washington, DC. At Lee College in Baytown, Texas and at the University of Houston-Downtown, she discussed the global perspective in international education with students and faculty. She shared her extensive knowledge of Islam, women's roles in Islam, and the conflicts between modern and traditional cultures with audiences at Morgan State University in Maryland and San Diego Mesa College. There she challenged listeners with the concept of the Islamic dress as both a sign of modesty for women and as a "form of emancipation, freeing women from the madness of fashion-oriented society."

Assistant professor of natural sciences at Nanyang Technological University in **Singapore** and renowned research scientist, *Jean Wan Hong "John" Yong* was affiliated as a Fulbright Scholar for three months from November through February at Brown University's Watson Institute for International Studies to conduct research on environmental policies. Author of over 50 articles, books and conference papers on the topics of climate change, environmental studies and plant physiology, the objective of Yong's Fulbright grant was to ascertain lessons Americans have learned in implementing policies that address current global climatic uncertainty and economic prosperity to guide Singapore in managing its environmental policies.

While in the United States, Yong obtained two travel awards through the Occasional Lecturer Program, one through the regular Occasional

Lecturer Program and the other by visiting a minority-serving institution. On his first OLP trip, Yong traveled to Teikyo Post University in Waterbury, Connecticut to present a lecture entitled "Environmental and Conservation Issues in Southeast Asia: Problems and Solutions." Through the OLP minority initiative, Yong went to the Los Angeles Valley College where he spoke to biology students about Southeast Asian environmental and conservation issues.

Fulbright Visiting Scholar *José Antonio Sánchez Román*, a researcher at the Universidad Ortega y Gasset in **Spain**, was affiliated with The Ohio State University to carry out a lecturing program in non-U.S. history for the spring quarter. Sánchez Román lectured on his research, which focused on the history of Argentine and Brazilian entrepreneurs and their role in the economic and political development of the two countries between 1880 and 1930. The University of Arizona's Center for Latin American Studies invited Dr. Sánchez Román to come for a week to talk to the university's students and faculty in history, Latin American studies and geography.

Renowned multi-color woodcut artist from **Uganda** *Fred Kato Mutebi* was affiliated with Christian Brothers University in Memphis, Tennessee as a Fulbright Visiting Scholar-in-Residence for the academic year. There, he taught as well as team-taught two courses per semester on printmaking and African art as a response to political conflict. Mutebi was invited by The University of the South in Sewanee, Tennessee where he conducted a hands-on woodcut printmaking workshop and gave a visual presentation on Uganda as a source of inspiration for art and the role of the artist in the Ugandan society. The University of Colorado

at Boulder also invited Mutebi to present his work as part of the Art and Art History Department's Visiting Artist Series.

Visiting Scholar Stories

Occasional Lecturers are drawn from a larger pool of Visiting Scholars who are in the United States as Fulbright researchers and lecturers. These Visiting Scholars routinely express how personally and professionally gratifying their Fulbright experiences have been, whether they are here for only a few months or a full academic year. Institutions hosting these Visiting Fulbrighters are equally pleased with how much their visitors are able to share with their students and faculty, from cultural details about their home countries to technical expertise in a variety of disciplines as diverse as astrophysics, music and literature. These stories are just a few examples of successful recent visits. To read more scholar stories, visit our Web site at www.cies.org.

Africa

Serigne Gueye went to the University of Pennsylvania School of Medicine to further his research on prostate cancer in black Africans and actually accomplished even more. He acquired new research skills, observed procedures that are rare in **Senegal**, and learned how to write a grant application.

"Working in Pennsylvania was a very exciting experience," says Gueye, a professor of urology at University Cheikh Anta Diop and Head of Urology at Grand Yoff General Hospital in Dakar, Senegal. He observed clinical procedures and prostate cancer surgery at the Hospital of the University of Pennsylvania in Philadelphia and studied with Dr. Albert Ruenes at Doylestown Hospital. He also learned a lot about medical education in the United States, and it seems to

have been a good career move: he was promoted to chief medical officer at Grand Yoff General Hospital when he returned to Dakar.

Since returning home, Gueye has applied for funds to set up research facilities in Senegal with a collaborator from the University of Pennsylvania.

"I would love to have the opportunity to visit the United States on a regular basis," he adds, "to update my knowledge."

East Asia and the Pacific

"I saw my grant as a wonderful opportunity to pursue my research without the diversions and responsibilities that are part of being a university teacher," says *Claire Smith*, an expert in Australian Aboriginal culture who teaches at Flinders University in Adelaide, **Australia**. As part of her Fulbright research project to develop principles for using indigenous material in multimedia, Smith worked with Native Americans in various parts of the United States at community, state and federal levels. She also had the opportunity to work with Harriet Mayor Fulbright, widow of Senator J. William Fulbright. Smith met Mrs. Fulbright at a Fulbright Scholars enrichment function and invited her to be patron for the Fifth World Archaeological Congress, held in Washington, DC in June 2003. Smith and Joan Gero, a Fulbright alum and professor of anthropology at American University, organized this conference on indigenous peoples and cultures.

Eurasia

When anthropologist *David Lordkipanidze* and his team unearthed three 1.7 million-year-old skulls and tools at Dmanisi in the **Republic of Georgia** between 1999 and 2001, they realized this was no routine dig. Scientific dating

techniques have established the two fossilized skulls of hominids (erect biped mammals) they found as the earliest evidence of human ancestors outside Africa.

Lordkipanidze spent four months in as a Fulbright Visiting Scholar at Harvard University, where he could compare his team's results with the university's rich collection of fossil casts. Lordkipanidze says he chose paleoanthropology (the study of fossilized hominids) because he has always loved detective stories.

Lordkipanidze lectured, visited, and participated widely in seminars at Harvard, the University of Michigan, the University of Illinois, the Natural History Museum of New York and several other institutions.

Shortly after returning home, Lordkipanidze realized a dream: the highly regarded magazine, *Science*, ran a feature on these discoveries that may provide the missing link in human evolution between Africa, Asia and Europe. He was also promoted to Deputy Director of the Georgia State Museum.

Europe

Anne Moen, a Norwegian scholar who studied health communications technologies with a leading U.S. developer of Web-based resources for patients, says her Fulbright experience "reiterated the importance of people-to-people relationships." After six months of study with University of Wisconsin–Madison's Patricia Flatley Brennan and with a team seeking to determine how patients handled health information at home, Moen says she was much better prepared to promote Web-based health and recovery management tools in **Norway**.

Moen adds that the Fulbright Program has played a role in her professional development since her

student days at the University of Oslo's Institute of Nursing Science. American Fulbright Scholars visited regularly and even helped to develop its doctoral education program, she says.

"To me," she says, "the real challenge is to integrate the Fulbright experience in daily, ongoing work and to pursue experiences where various perspectives enhance and drive the science forward."

The Middle East and North Africa

It was the children of **Saudi Arabia** who motivated *Omar Mohammad Muammar* to travel to Muncie, Indiana under a Fulbright grant.

Specifically, Saudi Arabia's gifted students and their particular needs, coupled with his intention to build an instructional program for them based on cutting-edge pedagogical tools, convinced Muammar to leave for one year his post at King Abdulaziz and His Companions Foundation for the Gifted in Riyadh. During that year the scholar worked out of the Indiana Academy at Ball State University, researching a variety of U.S. programs for gifted students. The ultimate goal of this research, to design a program suitable for use across Saudi Arabia, is a tall order, Muammar realizes. He must consider many factors specific to Saudi Arabia: "the high population growth of the country, the large area of the kingdom, and the central administrative and educational system," enumerates the scholar.

Muammar's Fulbright experience has energized him for the task. He reports, "I have left the United States with a tremendous feeling of humanistic and professional responsibility toward the gifted students in my home country. This year has given me a super motivation to have a new vision for gifted education in Saudi Arabia."

South Asia

Mohammed Shah Alam, a law professor from the University of Chittagong in **Bangladesh**, says his Fulbright stay was immensely rewarding. While at New York University (NYU) studying enforcement of international human rights laws by domestic courts, he found the American society, in general, and the intellectual community at NYU very cooperative and friendly. He says his trip was of great educational value. "The NYU School of Law is an intellectual powerhouse of legal learning," he says. "The faculty members and students with whom I spoke, the lectures I attended, the workshops and seminars in which I participated, and the library facilities I used provided a rare opportunity to feed me with the latest developments in law."

Alam says the facts that he has been to the United States before, knows the language and has some family here helped make him feel at home. "The United States can rightfully be proud of its rich cultural diversity, intellectual vibrancy, work ethics and, of course, its democratic values," he says. "It releases an enormous amount of self-sustaining force, which is capable of substantially delaying the process of decay that any developed society tends to face. It is a wonderful place."

Alam also plans to publish his research results and continue collaborating with his peers in the United States.

Western Hemisphere

Servando Ortoll, a research scholar and sociologist from **Mexico**, was a member of the

inaugural class of the Fulbright/American Political Science Association (APSA) Congressional Fellowship Program. The program provides ten-month awards to Fulbright Visiting Scholars for research on the workings of the U.S. government through professional experience on Congressional staffs.

Ortoll worked for U.S. Senator Tom Daschle's (D-SD) Democratic Steering and Coordination Committee. Ortoll's language and managerial skills, as well as his background in sociology, served him well during his fellowship. In addition to providing translations of the senator's policy statements for the Spanish-speaking press, he also translated documents and provided phonetic pronunciations for others giving speeches, such as U.S. Senator Jay Rockefeller (D-WV) and U.S. Senator Joe Lieberman (D-CT).

Organizing and conducting the nationwide Annual Hispanic Leadership Summit, however, was one of Ortoll's main projects. Hispanic leaders from around the country attended the event and discussed topics of interest in the Latino community. Ortoll summarized these discussions, providing Senator Daschle's office with a window on the current concerns of this constituency.

Ortoll's experience as one of the first Fulbright/APSA Congressional Fellows was, by all accounts, a success. Jeffrey Biggs, director, Congressional Fellowship Program, says of Ortoll, "If scholars continue to be the caliber of Dr. Ortoll, there will be international scholars in our fellowship well into the future."

ADMINISTRATION AND FUNDING OF THE FULBRIGHT SCHOLAR PROGRAM

The flagship international educational exchange program sponsored by the U.S. Government, widely known as the Fulbright Program, is designed to increase mutual understanding between the people of the United States and the people of other countries. With this goal as a starting point, the Fulbright Program has provided more than 250,000 participants—chosen for their leadership potential—with the opportunity to observe each others' political, economic and cultural institutions, exchange ideas and embark on joint ventures of importance to the general welfare of the world's inhabitants.

The Fulbright Program was established in 1946 under legislation introduced by former Senator J. William Fulbright of Arkansas. The Fulbright Program is administered by the Bureau of Educational and Cultural Affairs of the United States Department of State.

Since the establishment of the Program, nearly 44,700 Fulbright Visiting Scholars have conducted research or taught in U.S. universities, and approximately 42,800 Fulbright U.S. Scholars have engaged in similar activities abroad. The Fulbright Program awards approximately 800 grants to Visiting Scholars each year. Currently, the Program operates in 140 countries worldwide.

The primary source of funding for the Fulbright Program is an annual appropriation made by the United States Congress to the Department of State. Participating governments and host institutions in foreign countries and in the United States also contribute financially through cost-sharing and indirect support, such as salary supplements, tuition waivers and university housing. The Congressional appropriation for the Fulbright Program in fiscal year 2004 was \$131.6 million. Foreign governments, through their binational commissions or foundations, contributed an additional \$28 million directly to the Fulbright Program.

The J. William Fulbright Foreign Scholarship Board (FSB), composed of 12 educational and public leaders appointed by the President of the United States, formulates policy for the administration of the program, establishes criteria for the selection of candidates and approves candidates nominated for awards.

The United States Department of State, Bureau of Educational and Cultural Affairs develops policies to assure fulfillment of the purposes of the Program and administers it with the assistance of binational education commissions and foundations in some 51 countries that have executive agreements with the United States for continuing exchange programs, United States Embassies in 89 other countries and a number of cooperating agencies in the United States.

Binational commissions and foundations draw up the annual program plan for exchanges, in consultation with participating universities and organizations in the host country. They also screen, interview and recommend to the FSB qualified candidates for student and faculty grants under their exchange programs. In a country without a commission or foundation, the Public Affairs Section of the U.S. Embassy develops the program and supervises it locally.

The Council for International Exchange of Scholars (CIES), under a cooperative agreement with the Department of State, administers the Fulbright Scholar Program for faculty and professionals. CIES is a division of the Institute of International Education (IIE) and has close working relationships with the major disciplinary bodies in the humanities, social sciences and natural sciences. During the terms of their grants in the United States, Fulbright lecturers and researchers are assisted by CIES.

Internationalize Your Campus Through the Fulbright Occasional Lecturer Program

The Occasional Lecturer Program (OLP) provides travel awards to Fulbright Visiting Scholars for round-trip transportation, which enables scholars to accept short-term guest lecturing invitations at colleges and universities.

Occasional lecturers

- offer department- or schoolwide lectures to students and/or faculty;
- lecture to classes where the scholar can make a contribution to the discipline, meet with faculty for an exchange of ideas and engage in informal discussions with students;
- enjoy home hospitality offered by the faculty or department host; and
- address community organizations that have a special interest in international relations.

Every Fulbright Visiting Scholar is eligible for one OLP trip. Scholars who visit institutions that serve predominantly minority-student populations are eligible for more trips.

The *Fulbright Visiting Scholar Directory* lists Visiting Scholars who are in the United States for the current academic year. Use this listing to find and extend invitations to scholars whose research or lecturing topics are of interest to your institution. The directory is also available online at www.cies.org.

For additional information on the Occasional Lecturer Program, please visit www.cies.org/sir/olp.htm, call 202.686.6235 or send an e-mail message to olp@cies.iie.org.
