Web Development Group 5/8/07
Present: Boyd, Candido, Juhl, Lennertz Jetton, Morgan, Walker
Action items for next meeting in yellow.

1. Minutes from 4/10/07 meeting
   approved.

2. StaffWeb Redesign

   The group discussed the StaffWeb survey results (posted at http://libinfo.uark.edu/webdocs/webdev/staffweb07surveyresponses.pdf). For the next meeting, members will bring their ideas for the main page organization of the new StaffWeb, using the feedback received from the survey.

3. Pryor Center
   Arthur and Beth reported on this project; the new page has been launched. There was some discussion of the full name of the center and how to incorporate it.

4. Audio Files and Ethel Simpson's Readings from the Ozarks Folk Encyclopedia
   Lora discussed some issues with how the metadata displays in various mp3 player programs. It was decided to use "spoken word" for genre and that 64 kbps was adequate sound quality. Lora can make an entire "cd" of all the files with the same metadata and then edit the unique elements in each one. She found an interesting script to embed an mp3 player in a web page, which Arthur is going to work on. Molly and Keenan will work on a prototype page.

5. Reports on other Current Projects
   a. FAL survey
      This is running now and has about 18 responses to date: http://libinfo.uark.edu/fal/falsurvey.asp.
   b. GIS Links and Web Site
      Links and pages have been migrated; waiting on Jan to return to finish this project.
   c. Leisure reading: Anne Marie has met with interested parties and hopes to have a draft prototype soon.
   d. Other summer projects:
      i. Beth discussed the coming ILLiad upgrade, which will include all web pages, on or about June 4th, the InfoLinks redesign, planned for mid-July, and the civil rights scanning project.
      ii. Lora mentioned that the Performing Arts Web site should be redone this summer, as well. Arthur has a prototype to work with.
      iii. (added after the meeting): the CUARL (Council of UA Research Libraries) subcommittee on K-12 Portal will be needing a web site this summer and admin database for entering resources.

Next meeting: May 22nd (unless LDAP and AD get us!)

Respectfully submitted,
B. Juhl
